

Height & tray adjustments unlock easily, yet lock into place & stay locked because of the Wedge-lok System. The metal plate features wedge-cut edges that conform

to the wedge-cut sections of the hardwood. When the knob is tightened, the inward tension pulls the metal plate snugly against the wood for a solid lock.

Slide Guides make angle and height adjustments on Best easels smooth. These circular graphite impregnated plastic inserts are used

wherever there is a slot in the wood of the easel. This part allows for smooth movement and protects the hardwood from the metal bolt.

Easel Assembly - Caballo Easel

- 1.) Unfold legs and stand up. Be sure legs are fully extended.
- 2.) Loosen black knobs on side by hinges, carefully lift back off drawing board. Support leg will unfold as you lift. Loosen black knob on support leg, adjust to desired angle and tighten black knobs.
- 3.) Carefully pull out drawer located on the end, take out mast and replace drawer.
- 4.) Insert mast into drawing board. Slightly rounded end should be up. Thread into 2nd gutter, other edge to be used for paint trays. To adjust the height of mast, lift mast and tighten black knob at the back of the drawing board.
- 5.) Finally, take 2 paint trays(1 Large, 1 Small) out of storage area below drawing board. Attach large paint tray first by loosening black knob, thread on to front gutter of mast, lower to desired height. Repeat for small paint tray. Your easel is now ready to use.
