

Large	12 - 1½" Wood Screws
Artist	3 - 1¼" Wood Screws
Organizer:	1 - ½" Silver Screw
#887136	2 Large Shelves
	4 Small Shelves

Large Organizer  
#887136

1.) Open box. Unwrap pieces and find bag of hardware. See box above for what hardware should come with each unit.

2.) Locate **Part #3 (Top Support Hinged Piece)** and **Part A (Back Support Leg)**. Attach **Part #3** to **Part A** using 3 - 1¼" wood screws.

Open hinged piece and align 3 predrilled holes on **Part A** with predrilled holes on **Part #3**. Secure with screws.

*(HINT: Start screws from outside to inside, just as tip of screw appears, align with predrilled holes and continue securing.)*

Set aside.

**NOTE: On the Large Artist Organizer you will be attaching 3 Pieces. On the Large Artist Organizer there will be corresponding numbers 1, 2 and 3 actually on the frame and the support pieces. The pieces are identified as numbers in the illustration.**

3.) To assemble frame, lay **Part B & Part C** parallel to each other on even working surface. Precut slots will be facing in and pre-drilled holes will be close to work surface. Position **Part #2 (Support Piece with Chain)** crosswise between **Parts B & C**, lining up the predrilled pilot holes. The chain will be facing down as it will later be attached to **Part A (Back Support Leg)**. Attach, using 4 - 1½" wood screws. *(HINT: Start screws from outside to inside, just as tip of screw appears, align with predrilled holes and continue securing.)* If you are assembling the Large Artist Organizer you will have one more step attaching **Part #1 (Plain Support Piece)**. You will follow the same procedure aligning predrilled holes and attaching with 4 - 1½" wood screws.

4.) To attach **Part #3** to frame, lay back support leg (previously assembled piece) on working surface so attached foot is facing up. Hinged piece will be open and facing up. Align predrilled holes on ends of **Part #3** with **Parts B & C**. Align with predrilled holes and finish securing with 4-1½" wood screws. *(HINT: Start screws from outside to inside, just as tip of screw appears, align with predrilled holes and continue securing.)*

5.) Carefully stand your organizer up on the frame and the back support leg. Secure chain to organizer using the ½" screw in the predrilled hole. Lastly, unwrap your small and large shelves and put into desired slots.
