

Color Wheels

A. The Artist's Color Wheel

The "original" standard for every school in the country. The Artist's Color Wheel provides a visual method of demonstrating the relationships of one color to another and the results of color mixing.

Number 499999 9 1/4" in diameter

B. Pocket Color Wheel

A smaller version of the traditional design.

Number 499986 5 1/8" in diameter

Giant Artist's Color Wheel (not shown)

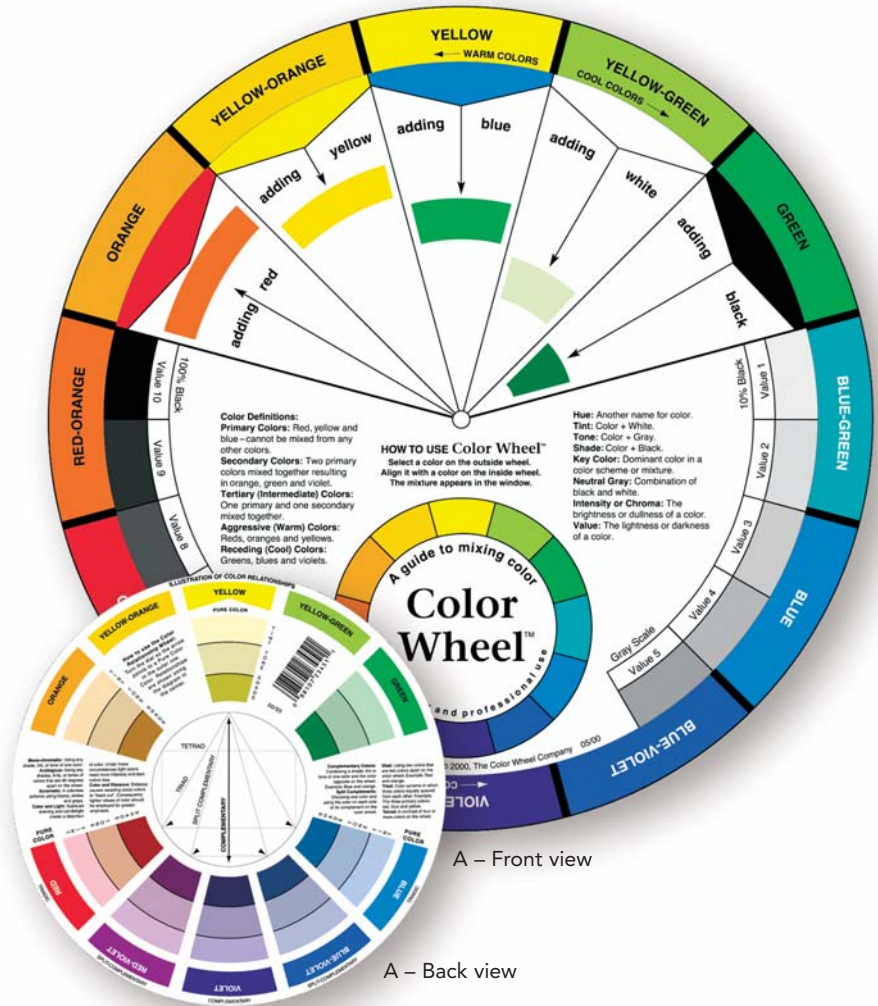

No school or art department should be without this valuable teaching aid. This large color wheel can easily be mounted on a wall for convenience as well as providing a pleasing graphic visual aid.

Number 499996 26" x 26"

C. Quiller Color Wheel

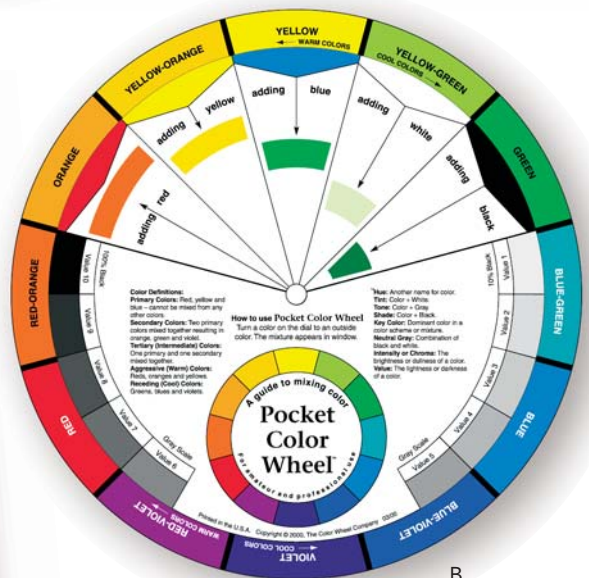

Designed by water media master, Stephen Quiller. Since 1988, thousands of painters, crafts people and interior decorators have used this color wheel to help them with color relationships and color mixing. Over 70 highly lightfast artist tube colors are located on the wheel in the order that the painter can have the most accurate analogous, complimentary and triad mixes. Ideal for the professional or student. The wheel is coated with a plastic laminate, for easy cleaning and for protection against any kind of weather. Includes instructions.

A. Watercolor Wheel

This product provides visual examples of graduated washes from pure color to undertones created from the actual watercolors. There is also information describing the most commonly used watercolors, their specific characteristics and other useful information. Important terms including reference to transparent techniques and the qualities of some of the most important pigments, makes using watercolors easier for both the experienced and newcomers to this media. Packaged in a poly bag with distinctive, pegable headers.

B. The Pocket Color Guide

A quick guide to colors produced by mixing two colors in varying proportions. All colors listed in the guide can be produced by mixing the primary colors: red, yellow, and blue, plus black and white. The 3" x 5" guide unfolds to 30" long. It features a high gloss protective UV coating.

Number 499998

C. Interior Design Color Wheel

This color wheel helps in selecting the colors that work well together. The Interior Design Color Wheel comes with simple instructions, definitions and illustrations which make the wheel easy to use. Each wheel is packaged in a special protective sleeve, pre-punched and reinforced for use in a 3-ring binder.

Number 499989

D. Gray Scale and Value Finder

A great tool to determine color value in all media. It has a unique cut-out shape which allows easy viewing and accurate readings. It is not just for black and white, it also works great with color.
